

RoyalGREEN™

ALL PURPOSE

Micronutrient Blend

GUARANTEED ANALYSIS

Zinc (Zn)	2.00%
Magnesium (Mg)	1.00%
Copper (Cu)	0.70%
Manganese (Mn)	0.50%
Calcium (Ca)	0.50%
Boron (B)	0.20%

RATE RECOMMENDATIONS

Soil Application: ROYALGREEN ALL PURPOSE MICRONUTRIENT BLEND is recommended for use on all types of soils. Because this is a concentrated solution, it should be diluted before use to ensure uniform coverage. Soil applications may be made by drip, sprinkler or furrow irrigation systems or in band or broadcast fertilizer applications. For trees or individual plants, the product may be diluted as above or sprinkled directly on the soil uniformly under the plant's drip line, then watered in. NOTE: The rates given below are based on broadcast application. If broadcast rates are used for spot or banded applications, phytotoxicity may result. **Field, Row, Vegetable Crops:** Apply 2-8 quarts per acre. **Fruit, Tree and Vine Crops:** Apply 2-10 quarts per acre or 1 to 4 Tbsp per inch of tree diameter. **Ornamentals:** Apply 2 Tbsp for small shrubs and up to 2 Tbsp per inch of tree diameter for large trees and shrubs. **Turf:** For professional use apply to only actively growing turf. Apply 4 oz per 1,000 sq. ft. or 1.5 gallons per acre.

Foliar Application: Avoid applying this product when plants are suffering from moisture stress. If there is any doubt, apply the spray solution to a small test area of the crop or foliage to assess any undesirable effects or phytotoxicity before general application. **Field, Row, Vegetable Crops:** Apply 1-2 pints per acre in a minimum of 20 gallons water.

Fruit, Tree and Vine Crops: Apply 1-2 pints per acre in a minimum of 25 gallons water. For smooth skinned fruit apply 1 pint per acre in 50-100 gallons of water. **Citrus:** Apply 1-2 pints per 100 gallons of cover spray any time except during bloom. **Aerial:** Apply 0.5-1 pint per acre in at least 10 gallons of water.

Optimum rate of application will vary depending on treatment interval, soil properties (such as pH, organic matter content, texture), weather conditions, time of year, plant species and its nutrient requirements. For best results, follow soil/tissue test recommendation.

GENERAL INFORMATION

ROYALGREEN ALL PURPOSE MICRONUTRIENT BLEND is an EDTA chelated solution designed to address multiple nutrient deficiencies by use in liquid fertilizers and suspensions as a soil application and or foliar or through irrigation for all crops requiring zinc, magnesium, copper, manganese, calcium and boron.

MIXING AND HANDLING INSTRUCTIONS Fill mix tank with half of required water volume and begin agitation. Add products in this order, mixing thoroughly after each addition: adjuvants, pesticides, then fertilizers. Fill tank with remainder of water and continue agitation until solution is completely mixed. Check chemical mixture compatibility using a jar test prior to application. Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rains are expected. Apply this product only to your lawn/garden. Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices.

PRECAUTIONARY STATEMENTS: Based on currently available data, this product is not classified as a hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling.

FIRST AID: If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If exposed or concerned, or if eye irritation persists, get medical attention.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store locked up.
