

RoyalGREEN™

MICRONUTRIENTS & BIOSTIMULANTS

ALL PURPOSE

ROYALGREEN™ ALL PURPOSE is an EDTA chelated solution designed to address multiple nutrient deficiencies by use in liquid fertilizers and suspensions as a soil application and or foliar or through irrigation for all crops requiring zinc, magnesium, copper, manganese, calcium and boron.

APPLICATION INSTRUCTIONS & USE RATES

MIXING AND HANDLING INSTRUCTIONS:

Fill mix tank with half of required water volume and begin agitation. Add products in this order, mixing thoroughly after each addition: adjuvants, pesticides, then fertilizers. Fill tank with remainder of water and continue agitation until solution is completely mixed. Check chemical mixture compatibility using a jar test prior to application. Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rains are expected. Apply this product only to your lawn/garden. Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices.

PRECAUTIONARY STATEMENTS:

Based on currently available data, this product is not classified as a hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling.

FIRST AID:

If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If exposed or concerned, or if eye irritation persists, get medical attention.

STORAGE AND DISPOSAL:

Do not contaminate water, food, or feed by storage or disposal. Keep out of reach of children. Store locked up. Dispose of contents/container in accordance with local regulations.

PRODUCT AVAILABILITY

ROYALGREEN™ ALL PURPOSE is available in 250 gal totes and bulk tankers.

ALL PURPOSE GUARANTEED ANALYSIS

Zinc (Zn)	2.00%
Magnesium (Mg).....	1.00%
Copper (Cu)	0.70%
Manganese (Mn).....	0.50%
Calcium (Ca)	0.50%
Boron (B)	0.20%

RATE RECOMMENDATIONS

SOIL APPLICATION:

ROYALGREEN™ ALL PURPOSE is recommended for use on all types of soils. Because this is a concentrated solution, it should be diluted before use to ensure uniform coverage. Soil applications may be made by drip, sprinkled directly on the soil uniformly under the plant's drip line, then watered in. NOTE: The rates given below are based on broadcast application. If broadcast rates are used for spot or banded applications, phytotoxicity may result. Broad Acre/Row Crops: Apply 2-8 quarts per acre.

FOLIAR APPLICATION:

Avoid applying this product when plants are suffering from moisture stress. If there is any doubt, apply the spray solution to a small test area of the crop or foliage to assess any undesirable effects or phytotoxicity before general application. Broad Acre/ Row Crops: Apply 1-2 pints per acre in a minimum of 20 gallons of water. Aerial: Apply 0.5-1 pints per acre in at least 10 gallons of water.

Optimum rate of application will vary depending on treatment interval, soil properties (such as pH organic matter content, texture), weather conditions, time of year, plant species, and its nutrient requirements. For best results, follow soil/tissue test recommendation.

ADDITIONAL SPECIFICATIONS

Weight Per Gal: 10.67 lb/gal

Specific Gravity: 1.28
